Radio Broadcasting Station

Suite 92, 154 W. 57th Street
~~10 West 60th Street~~

New York

Dear Friend:

Thank you for your good message, expressing interest in our programs. WHAP has a strong staff of Protestant speakers, and our educational campaign must be carried on until the conflict between American principles and Roman Catholic dogmas is understood by the American people. We do not oppose the religious faith of anyone. We do oppose the political doctrines of Romanism.

We regret that we have no copies of these talks for distribution. It will be an aid to the cause for our friends of the air to tell their acquaintances to listen in to WHAP, and so extend its American influence. Newspaper clippings bearing upon this subject, and lists of names and addresses of those to whom our circular letters and literature may be sent are helpful to us.

We are supported by contributions from you of the radio audience. May we hope that you will feel moved to help us stay on the air? It is not big giving by a few, but the large number of contributions from the Protestant patriots, which enables station WHAP - your station - to continue its service. Our program hours are:

Monday 6 - 8 P.M., Wednesday 6:30 - 9:00 P.M.
Friday 8 - 11 P.M., Saturday 8:30 - 11:00 P.M.
Also a religious program is broadcast every
Sunday evening from 9:00 - 10:00 P.M.

With kind regards and all good wishes,

Cordially yours,

LOEW'S STATE

Broadcasting **WHN** Station

5

LOEW'S STATE THEATRE BUILDING
 Broadway, at 45th Street
 New York City

Dear Friend:

It was a pleasure to hear from you at such a distance from us. It speaks volumes for your receiver and its operation, and is a testimonial to us - in short, it tickles both of us.

WHN is on top of Loew's State Theatre Building, right in the heart of New York City. The Transmitter is a 500 Watter - wave length 360 meters.

The Station is a hard worker, starts at 2.15 p.m. and runs usually past midnight, as you can see from schedule below;

Daily	2.15 - 3.15 p.m.	Mon. Wed. & Sat.	7.30 - midnight
	3.45 - 5.30 p.m.	Tues. Thu. & Fri.	9.30 - midnight
	6.00 - 7.00 p.m.	Sunday	3.00 - 6.00 p.m.
			9.30 - 12.00 midnight

WHN also operates from 12 - 1.00 noontime on Tuesdays and Thursdays.

WHN is located on Broadway at 45th Street, is known as "The Voice of the Great White Way" which is most appropriate, because it is in the heart of the Theatre District, and the Bright Lights, and tries to give listeners joy and happiness thru the microphone. Entertainment is its forte.

This Station is always anxious to hear from its distant friends and invites mail - a log of the numbers heard being especially welcome.

Anytime you may be in New York City, you are invited to stop in and say "Hello" - good-fellowship is our constant aim.

Let's hope we can bring pleasure to you many days to come. We solicit suggestions and criticisms regarding our programs or transmission, also like commendations.

With thanks for your trouble,

Yours cordially,

W H N RADIO BROADCASTING STATION.

THE director endeavors to provide a varied and well balanced program of instrumental and vocal music, as well as drama, literature and speeches by prominent men. To this end he may draw upon the great wealth of genius to be found in New York City.

Supporting the director the members of the staff must be in close touch with the musical world and the world of affairs, for they speak the message of the day and through their code letters are known to the vast radio audience by the familiar quality of their voices.

The staff of Broadcast Central includes—

Studio*

*The Aeolian
Concert Studio*

BROADCAST Central is located at Aeolian Hall, 42nd Street and Fifth Avenue, New York City. Every feature of this station is unique, novel and an advance over anything of the kind ever before attempted. Two programs are transmitted simultaneously on different wavelengths, one on 405 meters with the identifying call letters WJY, (the other on a 455 meter wavelength, signing off as WJZ.) This makes necessary two studios, two amplifying systems, two transmitters and two aerials.

This station has its own private system of wires for connecting with the station entertainment and unusual feature numbers which cannot be brought to the station studios. A cable through the heart of the musical and theatrical district, with frequent outlet boxes and a permanent connection at Studio "D" in the Waldorf-Astoria Hotel, makes possible easy connection to any hall or theatre. The program in Aeolian Hall, the famous hall of the Aeolian Company and known in this newest adaptation as Studio "C," can also be put on at any time.

October 30, 1925

Dear Radio Friend:-

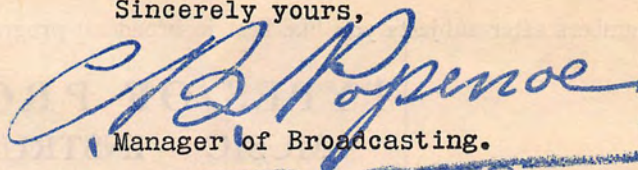

We know you desire the best obtainable in broadcasting programs. We are more than anxious to provide these programs. You will realize that it is very difficult to please the tastes of everyone in the great group of radio listeners. To enable us to ascertain your wishes in broadcast programs, the enclosed questionnaire is being mailed to all those who have written or otherwise expressed themselves as to their interest in the pioneer broadcasting station in the East, WJZ

Perhaps you have listened to us since early in October, 1921, when WJZ was first erected in Newark, N. J. We have grown much since then and this expression of your wishes will assist us greatly.

The questionnaire is impersonal; you are not even asked to sign your name. Some of the questions may seem irrelevant, but we assure you the information will be very helpful in our task of serving you.

We thank you for your past enthusiasm and hope that, by filling out this questionnaire and returning it as soon as possible, you will help us to please you further.

Sincerely yours,

Manager of Broadcasting.

NEW YORK, N. Y.**

Radio Corporation of America

33 West 42nd Street

New York, N. Y.

Station W J Z

Via  **RCA**

November 25th, 1925.

Dear Radio Friend:-

In extending to you our appreciation of your comment relative to our new high power station at Bound Brook, N.J., the following facts may interest you. You realize that the programs are arranged and microphone input made in New York, sent over Western Union lines to Bound Brook and radiated from that point.

The Radio Corporation of America has recently opened a new Super-Power broadcasting Station, the first in the world to be supplied with regular high-grade program material from a metropolis of the size of New York City and located near such a city. The Station is near the Raritan River, about one and one-half miles from Bound Brook, New Jersey, and three miles from New Brunswick, New Jersey. It is connected by means of private wires to the studios and control room of Station WJZ, Aeolian Hall, 33 West 42nd St., New York City, thirty-five miles away.

The Station has an antenna power of approximately 50 kilowatts. Two complete transmitting sets are provided, one of which is used for regular broadcasting, and the other for short wave broadcasting. Spare equipment is also provided for the main broadcasting set, so that should any portion of it fail, a spare unit can be placed in service instantly. Each of the transmitting sets requires 250 KW power input.

The main set used for broadcasting comprises a number of 10 KW watercooled oscillator tubes, with a larger group of similar tubes functioning as modulators. The incoming signal from New York, over the wire lines, is amplified by means of 5-watt and 50 watt balanced audio frequency amplifiers.

The short wave transmitter is similar in design to the regular broadcasting transmitter, and will be used for special long range re-broadcasting experiments.

The regular broadcasting transmitter is connected to a "T" antenna having a flat top 220-feet long, and a lead-in 250 feet in length. This antenna is supported by two 300-foot steel towers placed 700 feet apart. The grounding system is located directly beneath the antenna, and consists of six radial overhead feeder wires which terminate in underground "star-fish" ground connections. The antenna is designed and operated in a fashion which results in exceedingly high radiation efficiency and accounts for the excellent transmission characteristics of this station, which have already been amply demonstrated in preliminary experimental tests.

The wire lines from New York to the station are entirely in underground or over-head cable, thus assuring the maximum reliability. They have been specially arranged to provide undistorted transmission and low noise level, (that is, silent operation.) The entire

November 25th, 1925.

circuit consists of thirty-six miles of #13 gauge paper cable, a number of pairs being provided so that in case of the break-down of one circuit, others will be instantly available.

The main power supply for the station is provided by service from two different power plants of the Public Service Company of New Jersey so that in the event of failure of power from one source of supply a second is available. In fact, throughout the entire design of the station all possible precautions have been taken to insure continuity of service.

Preliminary tests of the station have indicated that it will give reliable daylight broadcasting service to cities within 200-400 miles. Thus, reports have been received from Washington, Baltimore, Philadelphia, Boston, Cleveland and similar points to the effect that good daylight reception is obtained. At night the station gives practically local service at points 500-1000 miles distant, according to reports received from such cities as Pittsburgh, Cleveland and Columbus. Excellent reception is also reported from Chicago. In the New York metropolitan district the station gives excellent service in all parts of the city and suburban districts, with extremely few reports to the effect that the signals are inconveniently powerful, even comparatively close to the station. The location at Bound Brook was very carefully picked, by preliminary calculations to give a maximum of service with a minimum of interference in the metropolitan area.

Since this station is connected by wire to the control room at Aeolian Hall in the center of New York City, it is possible to broadcast from it not only programs originating within New York, but also those reaching the control room over private wires to Washington, Philadelphia, Pittsburgh, Schenectady, Springfield, and Boston. These wire lines have recently been extended through Utica, Syracuse, Rochester, and Buffalo. In this way a great fund of splendid broadcasting programs will be collected for transmission to the American public.

It is expected that the station will have a reliable night range enabling it to reach into all parts of the United States, east of the Mississippi River. It is also anticipated that the station will frequently be heard west of the Mississippi, and on the West Coast, although it must be remembered that the time difference between the West and East Coasts is such that 8 to 11 p.m. on the East Coast corresponds to 5 to 8 p.m. on the West Coast, and it is probable that only when night has fallen over the entire country, will the waves from the station carry through satisfactorily to the West Coast. The Station has already been heard in San Diego. Thus, we may expect that in mid-winter the hours from 7 to 8 p.m. on the West Coast will be very suitable for hearing the New York programs being broadcast between 10 and 11 p.m. New York time. Mail has also been received from numerous parts of Mexico.

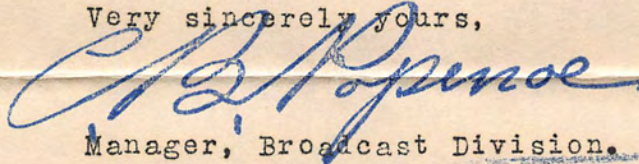

The Station, which will use the well-known call letters W-J-Z and which will operate on a wave length of 455 meters or a frequency of 660 kilocycles, represents a great and unique step forward in giving reliable service of the highest technical and program merit to a large portion of the population of the United States and Canada.

November 25th, 1925.

We expect to begin operating this new station more or less regularly within the next few weeks and I would suggest that the press be watched carefully for further notices.

It is hoped that you will advise us frequently of your criticism or other comment as to our programs or reception in your locality as it is only through your comments that we get an accurate idea of your wishes.

Very sincerely yours,

A handwritten signature in blue ink, appearing to read "C. D. Pennoe". The signature is written in a cursive style with a large, sweeping initial "C".

Manager, Broadcast Division.

Dear Sir:

We wish to thank you for your very fine postal card of the 31st. There really is no limit to how far or how often we reach places. We reach Canada and Cuba and different places east and west. There are quite a few places though in Ohio that we have received letters from, such as Cleveland, Cincinnati.

We have several very fine features on the air which we are sure you will enjoy, so tune us in as often as you can.

Trusting to hear from you again, we are

Yours very truly,

VOICE OF BROOKLYN, Inc.

Radio Station, 2 X H, W M C A
1282 Broadway, New York City

FEB 9 - 1925

Dear Mr. Thomas,

Many thanks for your communication with comments on our test program. You are one of the very first persons to hear our new station (2 - X - H experimental, W - M - C - A regular) on the air.

For the present, and pending the completion of a few necessary adjustments in transmitting apparatus, we are keeping secret the location of the station and the name of its operating company.

We feel confident we shall soon be ready for regular operation, and believe that at that time we shall have a genuine surprise for the radio audience and many fine programs on the air.

With many thanks again for your splendid co-operation, and assuring you that we shall welcome you as one of our regular listeners,

Very truly yours,

W. K. Gilliam
Director, Radio Station 2 X H, W M C A
