Get it Better with a Grebe

The Outstanding Christmas Gift

Outstanding—not alone because of the attractive cabinet with its exquisitely wrought
French marquetry panel; but for the days of
unusual pleasure that it promises. When
other presents have lost their charm, a
Grebe Synchrophase Seven will still be
giving happiness to all who hear it.

Grebe tone, unrivaled for naturalness, Grebe selectivity, ease of control and other advantages will
endure; for the Synchrophase
Seven is the culmination of over
eighteen years' experience in
building only the highest
quality radio apparatus.

"Nashville's Own Department Store"

After careful consideration and investigation, Cain-Sloan announces the addition of the Grebe line of quality radio to our progressive and fast-growing radio department.

> Our chief aim is to give our patrons the best in radio from a standpoint of quality and satisfaction. We endeavor to, and are giving, the utmost in service on all our installations, and our name is your guarantee that when you buy a radio from us it is right.

Every Musical Note CLEARLY Reproduced

From lowest bass to highest treble you get every note in full, natural tones with a Grebe Synchrophase Seven and Natural Speaker. The rat-a-plan of drums, the bass viol, the high notes of the soprano and violin are faithfully reproduced.

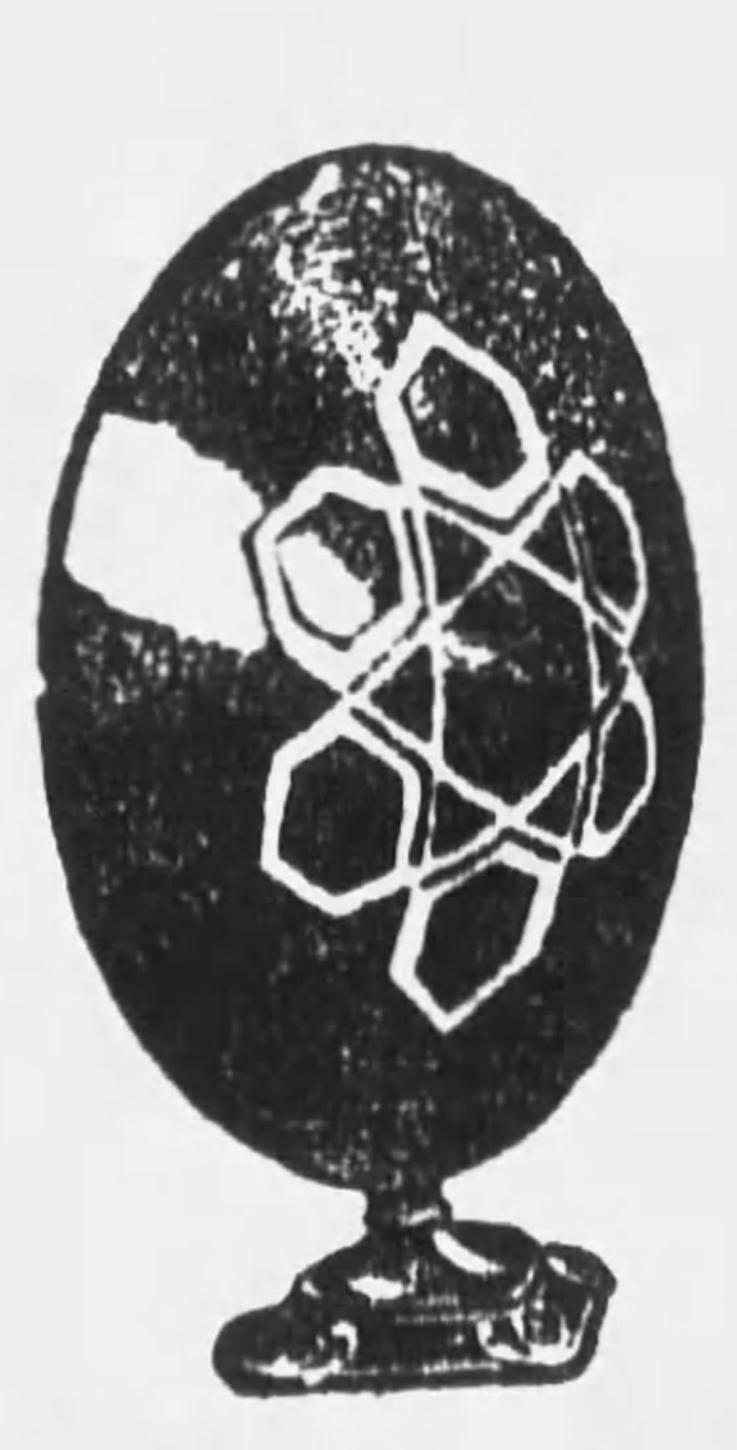

So lifelike is the quality of reception with this superior set you forget you are listening to radio. It has unrivaled breadth and depth of tone.

Every Grebe receiver has a heritage of 18 years' radio knowledge and experience, assuring you trustworthy performance and unerring satisfaction.
