Sony World Band Radios: Explore The Exciting Possibilities

There's a whole world out there waiting for you to explore. A world of sports. News. Drama. Entertainment. Culture. Ideas. Just turn the dial and there's something new to discover!

What a thrill to bring home the concert halls of Europe. Follow crises right from the countries where they're happening. Capture exciting sports events from distant continents. Tune in "ham" communications, marine, scientific and other intriguing broadcasts.

Come and explore all our shortwave possibilities. Then, you'll know that the best way to discover the world is on a Sony World Band Radio!

SPECIFICATIONS WORLD BAND RADIO

MODEL	FREQUENCY COVERAGE	DESCRIPTION	SSB/CW	SPEAKER	POWER REQUIREMENTS	CABINET	DIMENSIONS	WEIGHT
ICF-2001	FM 76-108 MHz AM (LW/MW/SW) Continuous 150~29,999 KHz	Computer-Controlled Direct Access Tuning Portable Communications Receiver	Yes	4" Dynamic	Battery "D" × 3 (4.5V) Display Backup "AA" × 2 (3v) DC Input (4.5v) AC Adaptor	Charcoal Gray	6 ¹ / ₁₆ "H × 12 ³ / ₁₆ "W × 2 ³ / ₁₆ "D	4 lbs.
ICF-6800W	MW/FM SW 1.6-30 MHz	PLL-Synthesized Portable Communications Receiver	Yes	4" Dynamic	Battery "D" × 6 (9v) AC 110/120/220/240v DC Input (12v)	Black	7 ¹ / ₄ "H × 17 ⁷ / ₈ "W × 9"D	13 lbs.
CRF-1	AM (LW/MW/SW) Continuous 10 KHz-30 MHz	Portable AC/DC/Battery Continuous Tuning AM Communications Receiver	Yes	4" Dynamic	Battery Radio "D" × 8 (12v) Memory "AA" × 2 (3v), DC Input (12v), AC Cord	Grey Metallic	4"H × 10 ³ / ₈ "W × 1 ¹ / ₈ "D	14 lbs. 9 oz.
CRF-330K	AM/FM ₁ /FM ₂ /MW/LW /SW: 1.6-30 MHz	Portable Communications Receiver with Precision Digital Tuning and Built-in Tape Recorder	Yes	4 ³ / ₄ " Dynamic	Battery* Radio "D" × 8 (12v); Clock "D" × 1 (1.5v); Built-in AC Cord	Black Aluminum Die-cast with Chrome Trim	13 ¹ / ₂ "H × 17 ³ / ₄ "W × 8 ¹ / ₈ "D	33 lbs. 15 oz.
ICF-7600	AM/FM/SW: 1-5	SW Band Spread 7-Band Portable	—	3" Dynamic	Battery* "A" × 4 (6v)	Black	4 ⁵ / ₈ "H × 7"W × 1 ¹ / ₄ "D	1 lb. 3 oz.
ICF-5900W	AM/FM/SW: 3.9-28 MHz	Precision Multi-Band Portable with X'tal Frequency Marker	Yes	4" Dynamic	Battery* "D" × 4 (4.5v), AC with Optional Adaptor	Metallic Gray Plastic	9 ¹ / ₄ "H × 8 ³ / ₄ "W × 4"D	4 lbs. 7 oz.

MODEL	ANTENNA SYSTEM	TUNING SYSTEM	STONE CONTROL	AFC/GAIN	METERS	CLOCK	ACCESSORIES
ICF-2001	AM/FM Telescopic 360~2143 KHz Built-in Ferrite Bar Ext. Antenna Terminals	10 Key Direct Autoscan LCD Frequency Display	Separate Bass and Treble	3 Step RF Gain	5 LED Signal Strength	—	Earphone, AC Adaptor, Wave Handbook Supplied. Optional: Car Battery Cord
ICF-6800W	FM, SW - Telescopic MW - Built-in Ferrite Bar MW, SW - Ext. Terminals	MW/SW LED Frequency Counter FM Rotary Dial	Separate Bass and Treble	AFC ON/OFF AM RF Gain	Tuning/Battery VU Meter	—	AC Cord, Wave Handbook Supplied. Optional: Headphone, Car Battery Cord
CRF-1	150 KHz~30 MHz Telescopic 10 KHz-30 MHz External Terminals, BNC Connector	LED Frequency Counter and Analog Dial	—	Noise Blanker	Signal Strength/ Battery Check	—	AC Cord, AC Power Adaptor. Optional: Headphone, Car Battery Cord
CRF-330K	SW - Telescopic FM - Telescopic AM/LW - Built-in Ferrite Bar Ext. Antenna Terminals	AM/FM/LW - Disc Vernier SW - LED Frequency Counter	Separate Bass and Treble	AFC Switch Noise Blanker (SW)	Tuning/ Battery Check	Quartz Crystal/ Digimatic, Second Counter	Earphone Supplied. Optional: Headphone, Car Battery Cord
ICF-7600	FM, SW - Telescopic AM - Built-in Ferrite Bar	SW Band Spread Tuning with LED Indicator	3-Step	AFC Built-in	—	—	Optional: AC Adaptor, Earphone, Car Battery
ICF-5900W	SW - Telescopic FM - Telescopic AM - Built-in Ferrite Bar Ext. Antenna Terminals	Film Dial & Band, Dial-Spread	Separate Bass & Treble	AFC Switch	Tuning/ Battery Check	—	Earphone, AC Adaptor Supplied. Optional: Car Battery Cord

Please ask your Sony dealer about our full line of accessories.

ACCESSORIES

AC-9W—AC adaptor for use with Sony radios that have a 6V external DC input.

AC-120W—AC adaptor for use with Sony radios that have a 4.5V external DC input, AC 120V, with output current level of 600mA.

AN-60—Shortwave long wire antenna.

DCC-120—Car battery cord for 12V battery to use with Sony products which have 6, 9, 10.5 or 12V DC input.

DCC-127A—Car battery cord for 12V battery to use with Sony radios that have a 3, 4.5 or 6V DC input.

DR-2—Comfortable, closed type headphones.

PC-9A—Converts stereo headphone plug with coil cord into mono mini plug.

RK-69A—Mini phone plug to phone plug. For recording from external source to aux. input.

ICF-2001

FREQUENCY-SYNTHESIZED RECEIVER WITH DIRECT-ACCESS/PRESET TUNING AND FM/AM/SSB/CW/LW/SW COVERAGE

This revolutionary new Sony* utilizes an on-board microcomputer to make tuning easier than ever. It replaces the tuning knob and dial with direct-access, digital key-touch tuning. Now you can receive the station you want just by pushing the numbered keys to match the station's frequency. You'll enjoy immediate access to shortwave, mediumwave and longwave broadcasts. Plus FM, SSB and CW. Once you "key-punch" your station, the frequency registers immediately on an LCD digital frequency readout. There's also an automatic scanning mode. You can scan from low to high frequencies. If you wish, you can even set the scan to stop when a strong broadcast is received. You've also got the ability to memorize and play any six stations at the push of a button. So you won't have to worry about retuning hard-to-find foreign broadcasts. There's a whole world of other features too! It's a fantastic radio of the future. Luckily you don't have to wait for the future because you can get it from Sony right now!

Sony's the Perfect Passport to World Entertainment

ICF-6800W

A 31-BAND, PORTABLE WORLD RECEIVER WITH QUARTZ-CRYSTAL, PLL SYNTHESIZED TUNING, LED DISPLAY, AND SUPERIOR CIRCUITRY FOR EXCELLENT RECEPTION

Imagine spanning 29 shortwave bands plus MW and FM from your deck or den. The portable ICF-6800W is a highly sophisticated world band receiver that brings home the drama of the BBC... news from around the world... music from many lands... and excitement from every country you tune in! A Quartz-crystal, PLL synthesized tuning system locks in the frequency of your choice with drift-free precision. A tuning preselector boosts sensitivity and reduces interference. So, for example, if you receive a weak signal from abroad, the preselector lets it stand out from neighboring "traffic". An LED digital display sweeps the MW band and the SW bands for pinpoint tuning. A rotary dial scale indicates FM tuning. An IF filter optimizes reception. Battery power or selectable voltage from 110 to 240 volts give you listening capability from anywhere on the globe. Outstanding stability, accurate tuning and 31-band reception create a world of entertainment you won't want to miss!

CRF-1

AC/DC, PORTABLE AM RECEIVER WITH CONTINUOUS AM/SSB/CW COVERAGE AND QUARTZ-CRYSTAL, FREQUENCY-SYNTHESIZED TUNING

Enjoy the big advantage of continuous band coverage of the entire 10 kHz to 30 MHz amplitude-modulated wave range. This offers you continuous AM tuning so you can sweep shortwave, mediumwave and longwave broadcasts without band-selector switching. Pinpoint tuning accuracy is assured by an LED frequency display augmented by a long tuning scale. Convenience is increased even further with the CRF-1's special locked-tuning and its complete array of tuning aids. Aids that range from a manual gain control and signal strength meter to an RF antenna attenuator. To complete this great Sony receiver, the compact portable design makes it a pleasure to carry and operate no matter where you're heading.

CRF-330K

HORIZON MASTER II WITH 29 SHORTWAVE/2 AM/FM/LW BAND PORTABLE WITH SHORTWAVE LED DISPLAY

Get command of every corner of the globe with 33 broadcast bands! Listen to opera from Rome, soccer from South America, foreign news from France. And with the built-in cassette-corder, you can tape the incredible diversity of the entire 29-band shortwave spectrum, intriguing ham communications, plus marine, military and scientific communication. A special quartz clock timer lets you preset recorder to tape by itself at any hour. You'll never miss a single exciting broadcast with Sony's quartz-controlled frequency synthesizer with an all-electronic LED frequency display that allows SW tuning to a super-accurate 1 kHz. The sky's the limit as you roam the world for the best broadcasts. Get your hands on the Horizon Master II and start exploring!

ICF-7600

5 SHORTWAVE/AM/FM BAND PORTABLE WITH SLEEK, READY-TO-TRAVEL DESIGN

Listen to music, news, sports and special commentary from around the globe. To BBC London or Radio Peking... Israel Radio or Radio Japan... Voice of America or American Armed Forces Radio and TV. Listen to programs in English or different languages, maybe even a new one you'd like to learn. The ICF-7600 gives you 5 shortwave bands to choose from. Plus AM and full, 76-to-108-MHz FM coverage. Whatever the wavelength, its sound makes this lightweight portable stand out among professional heavyweight models. For instance, shortwave bandspread tuning allows pinpoint accuracy, without station pile-up and troublesome fine-tuning adjustments. It also features a 3-position tone control and a whole world of fun and intrigue.

ICF-5900W

3 SHORTWAVE/FM/AM BAND PORTABLE WITH CRYSTAL CONTROLLED SW TUNING

Of course the Sony ICF-5900W pulls in great FM and AM sounds on the local broadcast horizon. But then it expands your horizon right around the world with 3 shortwave bands. You'll enjoy everything from foreign political broadcasts to world sports to international "ham" communications. There's superb listening with FET front-end section for FM plus dual conversion superheterodyne circuitry for SW. Features high-speed auxiliary tuning knob plus separate SW bandspread tuning knob coupled with Crystal Marker switch. This lets you zero in on shortwave frequencies. A beat frequency oscillator lets you receive SSB and CW transmissions. And no matter what you receive, you'll receive it loud and clear on the ICF-5900W!
