

Part IV – International Broadcasts

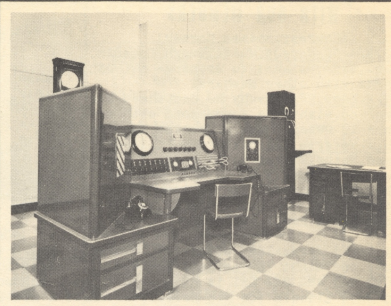

By the mid-1930s, the IDA had shifted its focus from foreign broadcast band DX to shortwave, but it continued to cover all bands. This is reflected in this mix of station photos-- shortwave, mediumwave, longwave, plus a few utilities and hams (the IDA membership included many hams).

Notes: The Radio El Mundo (Argentina) shortwave channels LRX and LRU carried the programming of mediumwave LR1 (pg. 1). . . . PLE was in Bandung, Indonesia (pg. 7). . . . 2RO was in Rome (pg. 7). . . . The EIAR station in Tripoli was operated by the Italian government, which controlled Libya at the time (1939) (pg. 7). . . . JQAK mediumwave and JDY shortwave transmitted from Dairen, Manchuria (pg. 8). . . . XEWI was in Mexico City (pg. 8). . . . YN3DG was run by Dennis E. Gallo, a ham who also operated as a broadcaster, YNDG, "Station Gilfillan" (pg. 8).

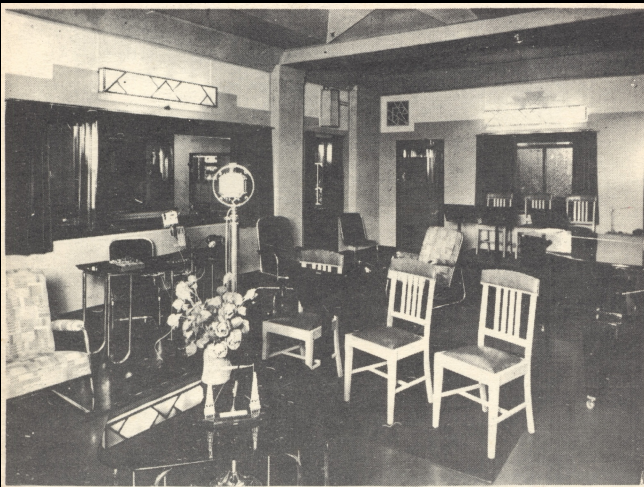

RADIO EL MUNDO

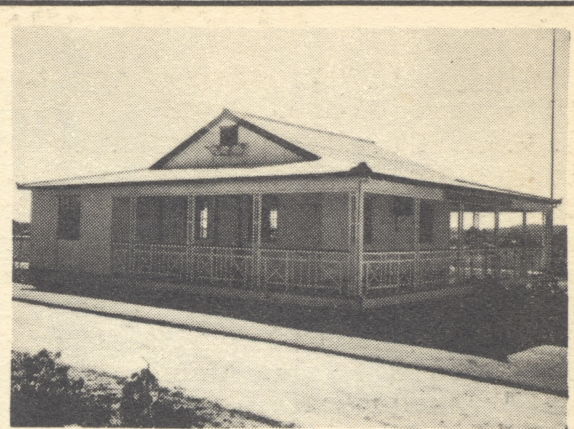

To the right we have the Master Control Desk, of "RADIO EL MUNDO", the finest and most powerful station in the Southern Hemisphere...
