ATWATER KENT radio brings you first hand news of important events from all parts of the world.

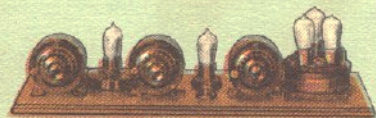

You can almost see the great football contest—so vividly portrayed play by play—or the world's champion boxing match round by round from your "ring-side" seat right in your own home!

And there are famous speakers; educational talks; entertainers. There is music—great symphony orchestras, famous opera singers—or if you prefer the lighter music, the greatest dance orchestras are at your service, the kind that make you roll up the rugs and dance!

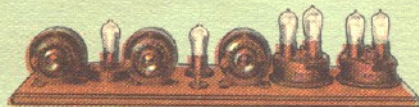

ATWATER KENT Receiving Sets and Loud Speakers are chosen by those who know—not merely because they are reasonably priced—but because of a reputation for quality and performance that is unsurpassed.

Model 9—4 tube receiving set  
\$65.00

Model 10—5 tube receiving set  
\$85.00

Model 12—6 tube receiving set  
\$105.00

ATWATER KENT MFG. COMPANY

Philadelphia

**T**HINK of traveling over 10,000 miles, figured in an air line, in a little less than three hours' time!

Think of visiting fourteen states and two foreign countries in one short evening!

Well, *that* is what I did last night, and I kept an accurate log of my voyage to prove my case to the skeptics.

It was interesting to hear them tell in Florida, how their fruit and vegetables were growing—and they laughed as they pointed out that the temperature was 74° Fahrenheit.

I remembered this, later on, when a man in Minneapolis told how the wires were down and traffic blocked due to snow and ice.

And don't allow anyone to convince you that this is not a music loving country! Why, I heard music at nearly every stop I made—good music, too.

I listened in dreamy enjoyment to Beethoven's Sonata as played in New York and was thrilled by an impassioned song from Lucia di Lammermoor, which I heard in Philadelphia. Chicago gave me jazz—lively and loud—I just couldn't help dancing a bit, all by myself. And

then there was more dance music, in Boston—a lot of the melodious, old fashioned airs—that I used to dance to when I was a boy.

Unfortunately, I can't possibly tell you *all* the interesting and instructive things I heard on my journey, but the thing that impressed me most of all was this—*the ease with which I took my trip.*

There I sat, in a comfortable chair in my own living room, and smoked a good cigar, while outside a howling wind drove the sleet against the window pane.

And I didn't have to follow any set course in this cruise—I just hopped hither and yon as my mood dictated.

But best of all is the fact that I can take the same trip again, or any part of it, almost any evening I may want to. All I will have to do is to lay my log before me and twirl the dials of my ATWATER KENT Receiving Set, when—Presto, the music and voices come welling out of my ATWATER KENT Loud Speaker.

I may be only a land lubber, but I'll wager no mariner bold ever got as much enjoyment out of his travels as I do with my ATWATER KENT Radio Equipment.
