KONT URANI 3

Tiranë, më 18/7/1940 XVIII°

Mr. David F. Thomas
Radio Station W.U.M.S.
Proctorville, Ohio
U.S.A.

Dear Sir:

We were glad to learn about the reception of our special broadcast dedicated to the American listeners May 14, 1940.

The details you gave concerning atmospheric conditions and various other difficulties during the transmission period have served to help us in studying the problem of achieving better and more perfect transmissions to your Country for the future.

Your interest in the Radio-Tirana Station not only pleases us but also encourages us to dedicate more attention to the American listeners who have shown such deep enthusiasm and interest for a better acquaintance of our people and our national music. We hope that future international conditions will soon permit us to do so.

Enclosed please find the card which verifies your reception of our special broadcast.

Thanking you sincerely for the interest you have shown and hoping that you will kindly oblige us by acknowledging receipt of this letter

We beg to remain

Very truly yours,

The Directory

PROCTORVILLE (Ohio)

Cher Monsieur,

J'ai eu beaucoup de plaisir de recevoir votre rapport de réception relatif à notre émission spéciale du samedi 30 Décembre 1933 organisée à l'intention des auditeurs des Etats-Unis.

Les indications correspondent en tous points avec le programme et je vous remercie d'avoir bien voulu vous mettre à l'écoute à une heure si avancée de la nuit.

Je vous serais obligé de vouloir bien de temps en temps me tenir au courant des conditions de réception des émissions de Radio-STRASBOURG P.T.T., nouvelle longueur d'onde 349m2 (859 Kilocycles).

Je serais également heureux d'apprendre quels ont été les résultats de la réception du 30 Décembre 1933 qui ont été, je le suppose, centralisés par la "International DXers Alliance".

Veillez agréer, Cher Monsieur, l'assurance de mes sentiments les meilleurs.

Le Chef du Service
de la Radiodiffusion

P. Schmitt

LOPIKRADIO

NEDERLAND

Lopik-Radio, 19.....

Hiermede berichten wij U de ontvangst van
Uw rapport d.d. 19.....

betreffende de omroepzender

..... welke door U op
..... 19..... te uur

De Beheerder Lopik-Radio

Your report of 12-11-'44 never reached us,
while we were under German occupation
at that time.

Gy.

Lopik-Radio, *May 5th* 19*48*

I herewith acknowledge due receipt of your
report dated *April 16th* 19*48*

concerning the broadcast transmitter

Propik II, which you received
on *December 11th* 19*44* *2⁰⁰-4⁰⁰* E.W.T.
at *Pavlovville, Ohio, U.S.A.*

I took due note of your remarks for which
I am very grateful and which are always of
importance for me.

I wish you a very good reception.

Netherlands P T T

Lopik-Radio

The Chief-Engineer

B. J. Schuur

Hieronder vindt U enkele korte gegevens betreffende de Nederlandse Omroepzenders welke opgesteld zijn te Lopik, een dorp gelegen op enige afstand van Utrecht.

De foto op de frontpagina geeft U een indruk van de ligging van het zendstation temidden van het Hollandse weidelandschap, met de beide „zelfstralende” antenne-masten, waarvan er één bijna 200 m. hoog is. In het gebouw zijn de beide zenders, ieder met een antennevermogen van 125 kW., opgesteld. De foto op de achterpagina doet U een blik slaan in de zenderzaal, op één der beide zenders met de daarbij behorende bedienings-lessenaar.

De zenders werken op de golflengte m en m en worden gebruikt voor de uitzendingen van de Nederlandse omroep. De omroepstudio's zijn gelegen te Hilversum, zodat de aankondiging over de zenders luidt: „Zender Hilversum I” (..... kp/s) of „Zender Hilversum II” (..... kp/s).

Here after you will find some particulars concerning the Netherlands broadcast transmitters, which are situated at Lopik, a village in the neighbourhood of Utrecht.

The picture on the front-page gives you an impression of the situation of the transmitting station amidst the Dutch meadows, with the two „self-radiating” aerial masts, one of which is almost 200 m high. In the building the two transmitters, each with an aerialpower of 125 kW, have been installed.

The picture on the back-page gives a view of one of the two transmitters with the additional operator's desk in the transmitting room.

The transmitters work on the wavelengths of 301.5 m and 415 m and are used for the transmissions of the Netherlands broadcasting services.

The broadcasting studios are situated at Hilversum, therefor the programmes are announced: „Transmitter Hilversum I (..... 722 kc/s)” or „Transmitter Hilversum II (..... 995 kc/s)”.

Research Labs. for Electrical Communication

of the R. Hungarian Post.

Budapest, Gyáli-st. 22.

Dear Sir!

Many thanks for the report. We checked it with our station-log and found OK. So we confirm herewith your reception-report of *28-th of January '34* upon the Hungarian short wave transmitter.

Here you find some datas:

Call letters: HAS, HAT;
Location: Székesfehérvár, 30 miles S-W of Budapest.
Wavelength: 43.86 m = 6840 kc and 21.92 m = 13.685
quartz-controlled.
Power: 5 kw.
Aerial: directed to W.

Programm-schedule irregular; time 5.⁴⁵ - 23⁰⁰
/ G M T / if any.

We wish you good reception-conditions for the future and enjoyment in our programmes.

Do you hear the 570 m, 120 kw - Radio-Budapest also?

Yours very truly
B. Marschalkó.

Director for the Labs.

Enclosed few cards of Budapest
