"THE VOICE OF THE HEALTH COUNTRY"

December 24, 1930.

Mr. David S. Thomas,
26 th. St. Ferry Co.,
Procterville, Ohio.

My Dear Mr. Thomas:

Thank you for your card of reception of December 18th., and we were on the air for a short test program, which you undoubtedly heard.

Kindly consider this a letter of verification on that program.

We are indeed pleased to hear from our distant listeners and when we are again on with a late program, we will drop you a card sufficiently in advance so that you may again listen for it.

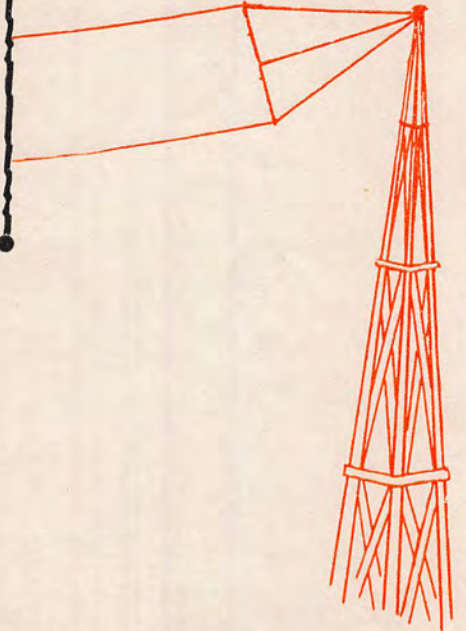

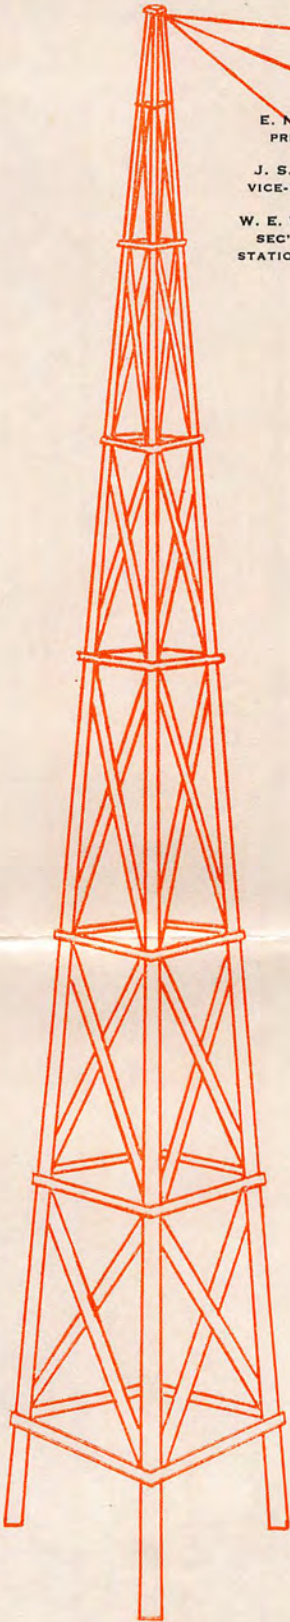

Again thanking you for your letter and wishing you the Season's Greetings, we are,

Yours very truly,

NEW MEXICO BROADCASTING CO.,

VERIFICATION OF RECEPTION

This is to certify that

*** DAVID F. THOMAS ***

sent this station a report of our signal picked up
3:30 to 3:30 ewt. Feb 7, 1944, at Proctorville Ohio,
which checks in detail.

Irvin Doyle

Vernon Hughes

Engineers on duty.

Dear DXer:

Many thanks for your report, if you trim this
letterhead you will have a pin up verification.

You sure have an assortment of aerials there. Fine buisness on
your receiver and DX club. I have a Halcrafters S20R receiver but
a rather poor location for reception. The reception here at the
transmitter is very good.

One of our announcers left a P.A. system to be repaired and
as this had a turntable and mike on it I decided to put on the
frequency check myself. Talking into the mike for the first time.

Yours truly,

Irvin Doyle.

February 14, 1944.

Mr. David F. Thomas
Proctorville, Ohio

Dear Sir:

It was with much pleasure that we read your report on our frequency test program broadcast Feb. 7.

We use Gates equipment nearly altogether. Your antenna system puts ours to shame. We use a grounded vertical shunt fed antenna. Fed through a coaxial cable $\frac{3}{4}$ ". Our studio is in town in the business district and we at the transmitter are located near the edge. Two of us run the transmitter end and the announcers run the studio end. However the program you heard originated at the transmitter.

Hollywood, California, the object of our test program received us very poorly. I can almost say "as usual". Our signal just doesn't seem to want to go west.

Wishing you success and prosperity, I am,

Very truly yours,

Vernon Hughes
