How these eminent people keep in touch with the NEW WORLD of EVENTS, POLITICS and MUSIC

“The new Stewart-Warner Magic Dial Radio brings me, from every corner of the earth, not only the cultural advantages of good music and intelligent entertainment — but vitally important information on the trend of international politics and world events. With the new Stewart-Warner All-Wave Radio, you can actually have a ‘ringside seat’ at any one of the greatest battles in world history — for a price that any modern home can and should afford.”

Says

WALTER
B. PITKIN

*Noted Professor
and Author of
“Life Begins at
Forty” and
Other Books*

M. GEORGES BUROSSE

*Commandant of the Great French Lines
(On board his flagship, “Ile de France”)*

“As master of a great ocean liner, I have a wide range of interests. I must be up-to-date on current events. So it is natural that I am intensely enthusiastic about the new Stewart-Warner Radio with the Magic Dial. At a simple touch of the hand, my Stewart-Warner brings me the best programs. With it I keep in intimate touch with the world at both ends of my voyage — Europe and America.”

ERNO RAPEE

*Director of Music
Radio City Music Hall — New York*

“I have made it an essential part of my daily program to tune in Paris, London, Rome, Madrid, Prague, Vienna and the South American capitals of culture. I listen as often as I can to broadcasts from abroad in order to keep our productions at the Music Hall up-to-the-minute in modernity and authentic in color. A turn of the Magic Dial on the new Stewart-Warner All-Wave Radio, and the music of the world floods my study — affording me priceless entertainment and fresh ideas for my work.”

The Fascinating **NEW WORLD** of RADIO ENTERTAINMENT

Mystery, Romance, Adventure and Thrills Aplenty to Be Found in New Greater Field Opened Up by Short Wave Radio

Today, radio broadcasting is done over three types of waves, commonly referred to as Long Waves, Standard Waves, and Short Waves. The relative breadth of these wave bands is clearly illustrated in the chart below. The so-called Long Wave Band is restricted to governmental and commercial transmission — almost entirely in code — and is of no interest to the average listener. The Standard Wave Band makes available the broadcasts with which everyone is familiar. Until now, the reception of the average radio set was *confined* to this band.

But, now, radio developments have opened up a new and greater field of entertainment — the Short Wave Band, heretofore *below* the range of an

ordinary radio set. This band — twenty times larger than the Standard Wave Band — makes available radio's latest, greatest thrill. Short Waves bring you Police Calls from cities throughout the country, conversations between Airplanes and Airports, programs from ships at sea, and the supreme thrill of direct broadcasts from over 200 Foreign Stations located throughout the world.

The radio of yesterday made available broadcasts in the Standard Wave Band only. The radio of today brings you this marvelous entertainment, from far greater distances and with far better tone, PLUS the fascinating **NEW WORLD** of RADIO ENTERTAINMENT to be found in the Short Wave Band.

HOW TO GET OVERSEAS STATIONS

● *Ever Hear a Broadcast Direct from Europe? Here's What It Takes . . . and Why It Is Possible*

Today, hearing direct broadcasts from Foreign Stations throughout the world is no longer a myth. It's an everyday occurrence — made possible by two things:

First, the perfection of simplified world-wide radio sets making it possible for the average listener to tune-in on the short waves over which Foreign Stations broadcast their programs.

Second, the development of better overseas stations, far more powerful and with new directional aerials especially designed to broadcast entertaining programs to the United States and Canada, and to far flung colonial possessions.

Today, the whole world is at your command for merely the price of a good All-Wave radio set, which receives short wave as well as standard wave broadcasts. Now, practically all leading radio manufacturers offer such sets, so you have plenty to choose from. But, select your Round-the-World Radio carefully. Favor the manufacturer with the most experience. Then, have installed in your home a good short wave aerial, one especially suited to your individual location.

In this magazine you will find a listing of the most frequently heard overseas stations, and the hours each is on the air. Supplement this information with that to be found in the leading short wave radio magazines, because changes in Foreign Sta-

tion broadcasts may occur frequently. Especially recommended is the magazine published monthly by the International Short Wave Club, of East Liverpool, Ohio. Subscription only \$1.00 per year. Keeping constantly posted on short wave broadcasts will lead to a greater enjoyment of your Round-the-World Radio.

WHY YOU CAN HEAR FOREIGN STATIONS

● Programs from overseas stations are broadcast on short waves, because short waves travel such great distances. The reason for this is clearly shown in the following charts, illustrating the difference between the travel of standard wave broadcasts with which you are familiar, as compared to broadcasts sent out over short waves. ●

Standard wave broadcasts follow the curvature of the earth and travel direct from the sending station to the radio in your home. The earth continuously absorbs these waves until, after they have reached a certain point, their strength is entirely dissipated.

Short wave broadcasts sweep upward until they strike an atmospheric layer, about 150 miles high, and are then deflected toward the earth. Thus avoiding the earth's weakening influences, short waves retain their initial strength and travel great distances.

GSD LONDON ENGLAND

11.75 Megacycles - - 25.53 Meters

HEARD THE WORLD OVER

Programs from this popular station, broadcast to the far flung units of Britain's mighty empire, emanate from the studios of the British Broadcasting Corporation, London. The type of music and the variety of program are comparable to that you might hear over an American chain station.

Eight transmitters are used — GSA, GSB, GSC, GSD, GSE, GSF, GSG and GSH — two of them being employed simultaneously on each broadcast to insure the best possible reception. If you cannot receive the program so well on one of the wave lengths, you can generally tune it in on the other.

Broadcasts from this chain of stations are directed daily to the five Empire zones — Australian, Indian, African, West African and Canadian. Listening to these broadcasts, one can capture much of the very atmosphere of London such as, for instance, hearing the striking of Big Ben and the Westminster Chimes as clearly as though he were walking down the Strand or crossing the famous Waterloo Bridge.

Big Ben, the chimes from which close the programs broadcast from England, is one of the historical landmarks of London. Built in 1858, it is still reputed to be the most powerful striking clock in the world. The bell weighs 13½ tons, the hammer 400 pounds. Its hour hand measures 9 feet long, and its minute hand 14 feet.

Above: The Control Room of the stations at Daventry, England, operated by the British Broadcasting Corporation.

At Right: Studios are in London, but the transmitting plant of these stations is located in Daventry. Here, eighteen immense aerials, including five groups of directional aerials, direct the London broadcasts to the vast British Empire.

PARIS and FRANCE

will probably be among the first objectives of your world tours via radio. Here is pictured the Arc de Triomphe in Paris, the city famed for its festivity and entertainment.

FYA PARIS FRANCE

15.24 Megacycles - - 19.68 Meters

"Hallo, hallo, ici c'est Radio Coloniale," says the announcer and you know you are listening to FYA, the most familiar French station, located in Pontoise. Its daily broadcasts offer a variety of entertaining music, interspersed with news announcements generally given in English.

INTERNATIONAL SHORT WAVE CLUB PHOTO

I2RO ROME ITALY

11.81 Megacycles - - 25.40 Meters

A popular, mellow-voiced signora announces this station as "Radio Roma-Napoli." Most of the programs emanate from the studios in Rome, but some are also picked up from Naples and other cities throughout Italy.

HVJ VATICAN CITY

15.11 Megacycles - - 19.84 Meters

When touring Italy via radio you can also tune in the special programs broadcast daily from Station HVJ, located in Vatican City.

Left: The transmitting station and immense aerials for Station I2RO are located just outside Rome.

Below: With uniforms and equipment of centuries past, the Swiss Guard presents an interesting spectacle, as it passes beneath one of the ancient portals on the Vatican grounds.

INTERNATIONAL NEWSREEL PHOTO

Below: Edward Startz, the famous and accomplished announcer, identifies Station PHI for local and world listeners. To make certain his call letters are clearly understood, this silver-tongued linguist repeats announcements in seven different languages — Dutch, Malay, English, French, German and Portuguese.

Programs from Station PHI are broadcast to the world from this transmitting plant, located in Huizen, Holland. Studios are maintained in Hilversum. This station is on the air Monday, Thursday and Friday from 7:30 to 9:30 A.M. and on Saturdays and Sundays from 7:30 to 11:00 A.M. (E.S.T.).

DJB BERLIN GERMANY

15.20 Megacycles - - 19.73 Meters

"GERMAN ROUND THE WORLD SENDER"

is the name given to this station by its operators the German Broadcasting Company. Opened with a cheery "Hello, America, we hope you have good reception tonight," programs from this station bring to U. S. radio listeners gems of classical music and song. Broadcasting is done from early morning until late at night, two transmitters being used on each program to insure best possible reception. Announcements are made in three languages — first German, then English, then Spanish. Call letters used are DJA, DJB, DJC, DJD. Studios are in Berlin, the transmitting plant being located in Zeesen, Germany.

EAQ MADRID SPAIN

9.86 Megacycles - - 30.40 Meters

The daily broadcasts from this station are colorful and entertaining, and your enjoyment of them will be further increased by the fact that announcements are made in English as well as Spanish.

The programs, broadcast from approximately 5 to 7 P.M. (E.S.T.), offer music, literature and news. The Saturday broadcasts, noon to 2 P.M., are intended primarily for Europe, Canary Islands and other Spanish possessions. On stated evenings each week, one hour of the broadcast is devoted to the International Broadcast Club of London, an organization established for creating good will and a closer relationship among the radio listeners of the world.

PHI HUIZEN HOLLAND

11.73 Megacycles - - 25.57 Meters

The land of dikes and windmills and famous old cities is an interesting one to visit via radio. PHI is not only an outstanding station in Holland, but the world over. Through this station, Holland keeps in touch with her colonial possessions in Dutch East and West Indies. During the summer months, PHI leaves its regular wave band of 11.73 megacycles and broadcasts over 17.77 megacycles.

Station J1AA, Kemikawa-Cho, Kiba-Chen, Japan

sends listeners a program verification card on the front of which is a picture of the station. Broadcasts from Japan are received daily in the U. S. from approximately 5:00 to 7:00 A.M. (E.S.T.).

Below: The front of the card which YV3BC sends to listeners, upon request, to verify receipt of programs. When writing this station, address YV3BC, Radiodifusora Venezuela, Caracas.

Above: This orchestra is typical of those which play the tantalizing tangos and rhumbas broadcast from South American Stations and heard so regularly in the United States.

YV3BC Caracas VENEZUELA

6.15 Megacycles - - 48.78 Meters

This station, located in the capital of the Republic of Venezuela — the most northerly country in South America — is heard consistently by Round-the-World radio listeners in the United States. Its entertaining programs offer a variety of typically South American tangos, rhumbas, songs, etc.

YV3BC broadcasts daily from 10:30 A.M. to 1:00 P.M., and from 4:30 to 9:30 P.M. (E.S.T.). Like several of the other South American stations, announcements are not made in English, but this station can be readily identified by a distinctive chimes signal.

VK2ME SYDNEY AUSTRALIA

9.59 Megacycles - - 31.28 Meters

"The Voice of Australia" is a welcome visitor each Sunday in many U. S. homes, with its diversified program of music, including an interesting and instructive talk on some section of Australia. The time of day is also broadcast, together with the chimes from the clock located on the Sydney Post Office.

Each program is opened and closed with the famous laughing call of the Kookabura bird. VK2ME broadcasts Sundays only, from 1:00 to 3:00, 5:00 to 9:00 A.M., and from 11:30 A.M. to 1:30 P.M. (E.S.T.).

"LA VOZ DE BARRANQUILLA"

P. O. Box 715
BARRANQUILLA -- COLOMBIA -- S. A.

WE VERIFY YOUR RECEPTION OF OUR STATION ON _____ 19 ____

HJ-1-ABB POWER 15w

(FORMELY H K D)

"Ha-Ya-Une-Ah-Bay-Bay," says the station announcer in his best South American English, and you know you are listening to HJ1ABB, Barranquilla, Colombia. And, if you want your reception verified, this station upon request will mail you one of the above verification cards.

HBL Geneva SWITZERLAND

9.59 Megacycles - - 31.27 Meters

This station, together with HBP, is maintained by the League of Nations for a dual purpose. First: to broadcast discussions of the various problems placed before this tribunal and, second, to create good will and a better understanding among the nations of the world.

The program is Saturday — 5:30 to 6:15 P.M. (E.S.T.) — consists of three fifteen minute talks — given first in English, then French, then Spanish. Listeners who wish to communicate with this station will receive prompt, courteous acknowledgment of their letters. Answers to any questions will be cheerfully given. Address: Information Section, League of Nations, Geneva, Switzerland.

TIME TABLE and LOG of the MOST FREQUENTLY HEARD FOREIGN STATIONS

Since there are over 200 Foreign Stations on the air — regularly or irregularly — the Round-the-World radio listener has plenty of opportunity for exploring among the short waves. Presented here is a carefully selected list of Overseas Stations, chosen on the basis of quality of program broadcast, consistency of reception and volume. These stations offer the greatest entertainment and are the ones most frequently heard. Their broadcasts provide an enjoyable variety of concert and symphony orchestras, typical native songs and music, and a goodly fund of information on current daily topics. See next page for additional Short Wave stations.

POLICE CALLS

With a short wave radio, you can listen-in on the incessant alarms broadcast to cruising squad cars — you can thrill to the pulse quickening dramas of city life in which radio plays such an important part.

Police stations come on the air, broadcast their message, and immediately go off the air. When a Police Call is tuned in, you can listen to several others by simply keeping your dial at the same location, because there are a number of police stations on each wavelength.

Short Waves Carry the Conversations between AIRPLANES and AIRPORTS

Skilled pilots, winging their way across the continent in mail and passenger planes, keep in constant touch with their ground crews via short wave radio.

With a Round-the-World radio set, you can eavesdrop on these epics of the air — hear warnings sent aloft of blinding fogs and hazardous storms — then, on the same wave length, listen to the voices of the pilots themselves, punctuated by the steady drone of the mighty motors.

Today, there are 138 Airplane Stations in the United States. They are assigned to no specific wave length sector — are interspersed throughout the entire short wave band — but are most concentrated between 3000-3500 kilocycles, and 52-59 meters (5.0 - 5.5 megacycles).

Short Waves Also Bring Broadcasts from SHIPS at SEA . . .

These stations relay telephone conversations from shore to ships, and vice versa. Also, they are frequently rented to broadcast special programs direct from the big ocean liners at sea. Ship Stations broadcast on four bands:

- 16.85 — 18.27 Meters (17.80 — 16.42 Megacycles)
- 22.50 — 24.30 Meters (13.34 — 12.35 Megacycles)
- 33.93 — 36.58 Meters (8.84 — 8.20 Megacycles)
- 67.87 — 73.17 Meters (4.42 — 4.10 Megacycles)

Phone calls from shore to ships are most frequently broadcast from Station WOO, Ocean Gate, N. J., on 17.12 megacycles (17.52 meters), and 9.53 megacycles (35.02 meters). This station phones ships, England and South America.

Calls of Prominent Passenger Liners:

GLRZ Aquitania	DAAC Europa
GMJQ Belganland	DXJC Hamburg
GBZW Berengeria	FNSM Ile de France
DDAS Bremen	GFWV Majestic
GFJX Caledonia	VQJM Monarch of Bermuda
DOBX Columbus	DHRL New York
DDDT Deutchland	GLSQ Olympic
GMBJ Empress of Britain	VQJP Queen of Bermuda

AMATEUR PHONE STATIONS

You can listen to the "Radio Engineers of Tomorrow" chat through thousands of miles of space with friends they never see. These stations are licensed by the Federal Radio Commission the same as any commercial broadcast station. But, these so-called "Amateur" stations are not assigned to any definite wave lengths, they can broadcast anywhere within the "amateur bands" established by governmental regulations. You can listen to Amateur Phone conversations at approximately 21 meters (14 megacycles), 75 meters (4.0 megacycles), 135-160 meters (1750-2000 kilocycles). The amateur band between 40-42 meters is reserved for broadcasts in code.

STEWART-WARNER RADIO

The Round-the-World Radio of Proved Performance

An exclusive Stewart-Warner feature, The "Magic Dial" really gives you 4 radios in one. By a simple adjustment you click into place the dial you want to use—one for standard American broadcasts; one for amateur, airplane and police calls; one for ships at sea and South America; one for all other foreign stations. "Geared tuning" makes short-wave selection as easy as local!

There is a Stewart-Warner Round-the-World Radio to fit any purse and to enhance the beauty of any decorative scheme—from smart, compact table models to consoles which are beautiful pieces of furniture as well as a source of endless entertainment, culture, useful information. Compare Stewart-Warner quality and prices with all others—and judge for yourself.

Gives You the Amazing

*Easiest to Tune World Wide Dial on
the Market. Really 4 Radios in One*

● Why gamble when buying a Round-the-World Radio? Stewart-Warner, the pioneers in simplified all-wave radio, offer you in today's "Magic Dial," these benefits of their extra years of experience: (1) Simplicity of clear, accurate tuning—even for the most distant foreign stations—never before possible at *any* price! (2) Remarkably low prices. Stewart-Warner has had time to bring all-wave radio to simplified, economical efficiency.

Foreign Reception Guaranteed

Why limit your pleasure to only American programs, when now you can have entertainment from all over the world—so easily and for so little? But don't expect "Magic Dial" results from anything but the new Stewart-Warner Radio. And don't let the new low prices prejudice you. The best foreign reception possible in your locality is positively guaranteed by Stewart-Warner.
