

SHORT-WAVE STATION LIST

Crosley developments have resulted in a tremendous improvement in Short Wave Reception. However, due to a variety of natural causes, atmospheric changes, seasons and time of day, also changes in station schedules, short wave programs cannot be tuned in with the same regularity as standard broadcasts.

Always tune very slowly and if you do not get the program you want, try for other short wave stations that may be "coming through". Some are

best heard during the day and others at night. In order to obtain the best short wave reception you should use a good antenna and ground. The Crosley Super Sensitive Doublet Antenna is especially designed for maximum efficiency in reception.

The following list covers the principal short-wave stations of the world, together with Eastern Standard broadcasting times.

LISTA DE ESTACIONES EMISORAS DE ONDA CORTA

Las creaciones y adelantos aportados por Crosley a la radio han resultado en un enorme mejoramiento en la recepción de onda corta. Empero, en virtud de una variedad de causas naturales, cambios atmosféricos, estaciones del año, así como cambio en los horarios de las estaciones de radio, los programas de onda corta no se pueden sintonizar con la misma regularidad que los que vienen por la banda de onda mediana o larga.

Sintonícese siempre lentamente y si no se consigue el programa que se desea, pruébense

otras estaciones de onda corta que quizás se estén recibiendo. Algunas de dichas estaciones se captan mejor por el día, y otras por la noche. Para lograr la mejor recepción de onda corta es preciso tener una buena antena y una buena conexión a tierra. La Antena Doublet Crosley Super Sensitiva está ideada especialmente para el máximo de eficiencia en la recepción.

La lista a continuación contiene las principales estaciones de onda corta del mundo, junto con las horas de radiodifusión—Hora Normal del Este de los Estados Unidos.

CLASSEMENT RADIOPHONIQUE DES STATIONS ONDES COURTES

Les développements Crosley ont eu comme résultat un immense Perfectionnement dans la Réception des Ondes Courtes. Cependant, en raison d'une variété de causes naturelles, de changements atmosphériques, des saisons et de l'heure du jour, aussi des changements de l'horaire des stations, les programmes des ondes courtes ne peuvent pas être sintonisés avec la même régularité que les émissions diffusées standard.

Sintonisez toujours lentement, et, si vous n'obtenez pas le programme que vous désirez, essayez d'autres stations d'onde courte qui

peut-être passeront jusqu'à vous. On entend les unes mieux pendant le jour, les autres sont entendues le mieux la nuit. Pour obtenir la meilleure réception des ondes courtes, vous devez utiliser une bonne antenne et un bon contact de terre. L'Antenne Doublet extra-sensible Crosley a été conçue spécialement pour une efficacité maximum de réception.

La liste suivant couvre les principales stations d'ondes courtes du monde entier, avec les heures standard de l'Est des émissions diffusées.
