THE EKKO COMPANY

Radio Products

111 WEST MONROE STREET
CHICAGO

February 1, 1927.

To All EKKO Stamp Collectors:

Do you realize that NOW is the "harvest time" for collecting EKKO Broadcasting Station Stamps? There are over 800 stations on the air, and this is a condition which cannot continue. It is almost certain that Congress will act in a very short time, possibly prior to your receipt of this message. This much is certain—radio broadcasting will be regulated and many stations, now on the air, will cease to exist.

All of this furnishes you with an incentive to get busy now and obtain all of the EKKO Stamps you possibly can. When a broadcaster signs off for the last time or changes its call letters, stamps of that issue are unobtainable, except on confirmations dated during its activity. This tends to place a potential value on those stamps of which comparatively few were issued. Aside from its record of your personal radio achievements your collection of EKKO Stamps is recording for you that which will be a history of broadcasting in a few short years.

Under the conditions of broadcasting during the last two years it has been utterly impossible to keep the EKKO Broadcasting Station Stamp Album up-to-date. It was revised in 1926 and copies are available at \$1.00 each. We are further endeavoring to serve you by preparing additional pages for the album. They are identical to those in your album, but no names of States are shown at the top. They are gummed for quick, neat insertion in the album where desired. Protective packing to assure them reaching you without damage, and postage costs ten cents, to which you add five cents for each sheet ordered. Proof of reception cards are always available at one cent each.

In order to assist you in your quest of the many new stations on the air we are sending you this message on the reverse side of an interesting and very complete radio log. This log possesses remarkable features to enable you to locate stations by wave length and particularly aid you in detecting confusing call letters. It is up-to-date and accurate as of January 24th, 1927.

Most stations have supplied themselves with EKKO Stamps, and you know there are stamps available at this office for the others upon presentation of their confirmations.

We believe this to be the most important bulletin we have yet issued to our host of radio friends. It is just a timely suggestion to take advantage of this condition while it lasts.

Yours very truly,

THE EKKO COMPANY.

P. S. To those who desire a list showing ownerships and addresses of the broadcasting stations, we suggest that they send 25c to Supt. of Documents, Government Printing Office, Washington, D. C., for a monthly service for one year. Request that it be dated to include the December 31st, 1926, issue which contains a complete list.
