FOR IMMEDIATE RELEASE

BOY SCOUT PROGRAM HEARD IN OVER 100 COUNTRIES

Scouting Worldwide, a program reporting on the activities and experiences of Boy Scouts throughout the world, can now be heard internationally over the facilities of WNYW, Radio New York Worldwide.

Hosted by veteran scouter Morgan Skinner, Scouting Worldwide features the actual voices of many original scouters such as Baden-Powell and Daniel Seaton. With special guests and in-depth coverage of scouting events throughout the world, Scouting Worldwide explores all the world's scouting movements and presents stories of the participation of prominent figures in the field of scouting.

Beamed to the United Kingdom, Europe, Africa and the Americas over five 50/100 kilowatt transmitters, Scouting Worldwide is broadcast on Tuesday at 1740 and 1940 GMT (12:40 & 2:40 PM EST) on 15.440, 17.760, 21.465 and 21.525 kHz. Scouting Worldwide invites the participation of listeners by tape, letter or postcard. All mail should be sent to: Scouting Worldwide c/o Radio New York Worldwide, 485 Madison Avenue, New York 10022 USA.

AMERICAN RADIO EXPLORES COMPUTER REVOLUTION IN U.S.

New York City, U.S.A.---Will computers replace man? Can computers talk? Are they intelligent? Can computers think for us, predict the future? What are the ethical and moral problems raised by the wide use of computers? These are some of the questions being asked in the United States which presently has almost 35,000 computers in operation. These are some of the questions answered twice each week when Radio New York Worldwide, WNYW, presents "The Computer Age."

Radio New York Worldwide, WNYW, one of the pioneers in international shortwave broadcasting, is once again first with the presentation of "The Computer Age," the first regular series of programs on either radio or television devoted exclusively to an investigation of computers and their effects on American society.

Broadcast every Thursday and Saturday, "The Computer Age" 25-minute programs are a lively look at the quiet computer revolution in the U.S. Through interviews with America's major experts in the field of electronic data processing and tours and demonstrations of actual computer installations, "The Computer Age" brings listeners around the world up-to-date information on these new machines which are changing the life of every American and will, in the future, affect every man on earth.

"The Computer Age" is broadcast on Radio New York Worldwide's international station, WNYW, on Thursdays and Saturdays at 2005 GMT, 3:05 P.M. Eastern Standard Time. "The Computer Age" can be heard on 15.440 megacycles (19.43 meters), 17.845 mcs. (16.81 m.) and 21.530 mcs. (13.93 m.).
