TO: JERRY BERG  
38 EASTERN AVE  
LEXINGTON, MA 02421

**Please accept this letter as confirmation of your reception report of  
WJNZ 1680 KHZ. ADA, MI**

On (Date): OCT 8 1998

From (Time): 2:28 to: 2:47 AM

WJNZ's broadcast transmitter is located approximately 10 miles  
due east of downtown Grand Rapids, Michigan.

WJNZ uses the Harris DX-10 10kw. digital transmitter.

The antenna system is shared with daytime sister station 1140 WXBV

WXBV uses a three tower in-line directional array antenna system.

WJNZ is diplexed into the center tower of the 1140 KHZ. array.

**Thank you for your reception report

October 25, 1999

Mr. Jerry Berg  
38 Eastern Avenue  
Lexington, MA 02421

Dear Mr. Berg:

Thank you for your reception report of "The Sports Station" AM 1660 WQSN Kalamazoo, Michigan. The details of your report of October 7, 1998 at 0219-0321 EST agree with our official program log on that date and time. I am very pleased to confirm your listening report by way of this QSL letter.

AM 1660 WQSN is one of 85 Expanded Band stations licensed between 1610 and 1700 kHz. The station first signed on the air the evening of September 24, 1998, with non-directional signals of ten thousand watts day and one thousand watts night. The coordinates of our transmitter site are N42.14.11 W85.34.37. This is a shared transmitter site with our co-owned AM 1470 WKLZ. Since our sign-on, we've received hundreds of listener letters from thirty-seven of fifty U.S. states, five Canadian provinces, Bermuda, Finland, Sweden, the United Kingdom, France, Germany, Italy, The Canary Islands and New Zealand!

AM 1660 WQSN is owned by Fairfield Broadcasting Company, locally owned and operated since 1972. In addition to AM 1660 WQSN, our holdings (all in Kalamazoo) are AM 1470 WLKZ (800 watts days, 1,000 watts nights, directional at night), AM 590 WKZO (5,000 watts days and nights, directional at night), and Q-106.5 WQLR-FM (50,000 watts non-directional).

AM 1660 WQSN is a full-time sports station and is affiliated with the One-On-One Sports Network. AM 1470 WKLZ is a full-time talk station and is affiliated with NBC and CNN News. AM 590 WKZO, one of the pioneer U.S. stations (established in 1930) is Kalamazoo's News/Talk station and is locally programmed. Q-106.5 WQLR-FM has an Adult Contemporary format and is an R&R, Gavin and Network 40 reporting station.

Thanks again for making radio an important part of your life and for sharing your listening with us. Feel free to visit our station on the world wide web. Our address is [www.wqsn.com](http://www.wqsn.com).

Cordially,

Ken Lanphear  
Operations Manager  
Fairfield Broadcasting Company

2/22/96

Dear Jerry,

First, let me thank you for your reception report and cassette of our new frequency on the expanded AM band. Believe me, it was a long and slow process from conception to completion, but we've finally made it. Reports such as yours have been arriving daily from all parts of the globe. This has both surprised and pleased us.

Next, I'd like to let you know that what you reported hearing on 12/8/95 was accurate, so please accept this letter as a formal verification. Ownership of the frequency has since been assumed by the Children's Broadcasting Corporation who program an innovative format known as "Radio Aahs (pronounced "Oz"). Should you continue to tune in WJDM 1660, this is what to listen for.

Now a little technical information about our station: 1660 kHz shares the same folded unipole antenna as our 1530 kHz transmitter. The tower itself is only about 80 feet tall and was newly skirted back in September when the new 1660 transmitter arrived. The tower and transmitters are housed in an elevated shack in a watershed area in Union, New Jersey. The new transmitter is a Harris DX10 which is authorized to run at 10,000 watts non-directional between the hours of sunrise and sunset. Otherwise it runs at 1,000 watts non-directional. The 1530 transmitter is a Broadcast Electronics AM-1 and is operated at 1,000 watts when 1660 is at 10,000. 1530 is a day-timer and shuts down at sunset.

I've enclosed something that may be of interest to you: It's a computer projection of WJDM's 1660 kHz signal pattern. This impressed us when it was done in 1992, so imagine how it felt to start getting letters similar to yours from all over the world! You should know that Mr. Quinn had been discussing the expanded band as far back as 1988 when I came on-board.

I thank you again for your letter and hope that you'll continue to check in with 1660 once in awhile to see how we're doing.

Yours,

Don Neumuller, Chief Engineer

Dear Jerry Berg,

This letter will confirm your reception of WHKT AM 1650 on the date you specified. We are currently testing our signal for WHKT.

The station will officially go on the air on or around April 1, 1999. WHKT is licensed to Portsmouth, Virginia.

It is a clear channel radio station which broadcast 10,000 watts during the day and 1,000 watts at night. During the day WHKT will reach Northeastern North Carolina and Southeastern Virginia as far as Richmond, Virginia.

We have been very pleased with the reception reports we have received. The programming for WHKT when it goes on the air will consist of sports, news, and talk with some ministry programs on the weekend.

We thank you for writing and confirming your reception of WHKT 1650AM on the radio dial.

Sincerely,

Susan Ervin  
Asst. Manager
