BRAZIL Noting the confusion concerning the broadcasting situation in this country, friend and expert Giacomo (Jack) Perolo of Sao Paulo has written directly to the NASWA FS with the following remarks: DENTEL, the Brazilian conterpart of your FCC, is presently introducing dramatic changes in the local bcasting scene; the full extent of such changes has not been formally made public, some preliminary decisions have already been reported by the press. It is not yet altogether clear how the country as a whole will be served in the next decade, broadcasting wise. One plan would call for tropical band bcasting in Northern Brazil, whereas Southern and Central Brazil would move to FM. There are also talks about a TV and AM(?) svc to the Amazon area via satellite. All this is being discussed at present. Opposite views by others would rather serve the Amazon area via a ground VHF system either using tropospheric scatter and/or ground repeaters. What has been done already is: (1) Individuals can own only a maximum of three stations; stns in excess of three will not have their license renewed. The measure will not effect corporations or networks established prior to such rulings. Some MW stations in N. Brazil are already affected by the ruling. (2) R. 9 de Julho, 9620; and, R. America, 11855 kc, have both been off the air for about 6 weeks, licenses not renewed by DENTEL. (3) Purely regional stations will have their fqys reassigned consistently with their primary area coverage; no sense in having Ribeirao Preto operating 15415, the stn knowing that their fqys will soon be lowered to the 60 or 90, or 120 MB. They are still active on 15415, tho, specially on weekends. (4) Many SW outlets are semi-active or on a limited sked, but are on the air over the weekends to bcast sporting events. From a logging standpoint, those are the best occasions to log Brazilians, between 1600-0000 GMT; but they are the best chances, especially for those who do not comm- and the language, to come up with wrong reports, as these are channels and transmitting swaps taking place, because of efforts to reduce operational coast by bcasters. This procedure has produced considerable confusion abroad within the SWLing fraternity. The "new" XYZ stn logged on the WJK channel, is in effect a channel lease. (5) Specifically, refer to the 15135 kc outlet, their formal ID is R. Record and the QTH is correct in WRH-73. I hope the above is of help. (Indeed it does Jack, thanks for taking the time and making the effort to advise us, Editor)...3315 R. Gazeta de Algoas, PP talk, native music, definite ID at 0300, 11/25. (CCDXA)...11950 R. DIEGO GARCIA (See earlier FLASH, Editor) This one is a pin point island of near arid bleakness in the Indian Ocean, south of Maldives, and east of Madagascar. It is a Naval Communications site, both for surface and submarine activity. Air traffic is occasionally via Nairobi or New Delhi. No large craft can land or take off due to physical size of the spot. Many Navy Seabee construction teams are there building facilities. There are no facilities for visitors whatever. While not classified, its not advertised either, the island is being used by permission of the British. I doubt any one will get a QSL from this Service. (Thanks, Ed Shaw, Va., for sharing this enlightening information with us, Editor)

ENGLAND 9740 BBC heard with vy strong sigs, 2315, with World Radio Club. Is this a relay by the CBC from Sackville?? (Bob Zilmer) (See Ernie Behr's remarks in December 1973 FS, Editor) ...6253A Heard 2320-2322, what I believe is a Pirate. Signal was erratic, only got a word now and then. Mention of BBC, man and woman in EE. Skip must have been about right. (Bob Zilmer)(Bob, I have logged the same on 6255, same details, its the VOA, obscure info on it here, possibly its a harmonic, but I don't think its a Pirate, thats my suggestion, Editor)

FILJI Radio Fiji was heard around 0220 on 15103 kcs, with ID in EE as, "This is R. Fiji, testing on 19 meter bands with 5000 watts". (SWCDXERS) (Possibly this info had better be classified with Nibi-Nibi, until some one can confirm, Editor)

PIRATES: A QSL and letter provides the following info FLASHES A.E.Martin, England: Radio Valleri(Dublin, Ireland) on fqy of 6300(card says 6317), though my report was sent for the quoted fqy of 6300 kcs. QSL card was received in 19 days for one IRC. It states that the outlet is a free radio station broadcasting with a power output of 100 watts from Dublin, that they hoped to bcast every Sunday till 1300...A QSL card and letter received from Tower Radio, Nottingham, England, on 6240. I presume this is a hobby pirate. Card was received in 8 days about. Is white in color, large black print, and with an inverted "V" at the center. XMTR Details: 220 watt peak output, using series gate modulation, crystal controlled. Antenna is a half-wave dipole 75', center fed.Signed by Chris Evans, Station Engineer; also, this one reported by A.E. Martin.

UNIDENTIFIED 7215 Daily except Sats., station on the air 2055-2150, good lvl, but heavy interference with IS of series of notes like shepherd's flute(sounds like Athens, Editor), followed by orchestral rendition. ID on the hour not understood, in language, then into news seemingly. (Hadley Cress) (Radio Ecclesia has been heard there in the past, but currently Abidijan, Ivory Coast, dominates the fqy, Editor)...17750 At 0328 with chimes like IS, YL anncr for, "Radio Swoboda", follows with talk in language, who??(Hadley Cress) (Its either one of RFE's numerous transmitters or one of the USSR's many services, Editor)...A station on 21715, in FF. Does not seem to be Paris. From 1555 to 1635, my logging period, I could detect no ID at 1600 and 1630. It seems to be a phnne type program with an identification of musical numbers. Who? (Ken Earhart, Pa.)

So ends this Mid-Month FS. HOLIDAY GREETINGS TO ALL, THANKS for the help, Best of 73, AL
